

Care and Cleaning Instructions

Proper care of porcelain enameled fixtures will result in the longest product service life. Under normal conditions, clean with mild detergent or soap and water. Bar Keepers Friend and a stiff nylon brush is highly recommended for best results on stubborn stains, surface rust, and slip-resistant surfaces.

Bar Keepers Friend (www.barkeepersfriend.com) is a mild oxalic acid based cleanser. Oxalic acid is a naturally occurring, (in plants, animals, and humans) safe and effective cleanser - widely available in most retail outlets.

Use the cleanser as directed by manufacturer with a stiff nylon brush to remove stubborn stains and rinse thoroughly.

Avoid using abrasive cleansers or scouring pads, especially on slip-resistant surfaces that might be worn away over time by unnecessarily vigorous mechanical abrasion.

Bootz products comply with the *Uniform Plumbing Code* of the United States, *National Plumbing Code of Canada*, and *International Plumbing Code* standards under ASME A112.19.1/CSA B45.2 *Enameled Steel Plumbing Fixtures*, ASTM F462 *Standard Consumer Safety Specification for Slip-Resistant Bathing Facilities*, and ASME A112.19.15 *Bathtubs With Pressure Sealed Doors*, as applicable.
